

Green  
is cool!

Eco-Friendly Cooling Solutions

## THE ENVIRONMENTAL CHALLENGE

# Green is cool!

**Frigoglass Ecocool** is the first *complete* and *commercially-viable* range of environment-friendly Ice Cold Merchandisers (ICMs). This innovative range offers cold drink availability to a wide range of beverage companies across different trade channels.

**Frigoglass Ecocool** minimizes energy consumption as well as the impact on the environment through:

- The use of natural refrigerants **Hydrocarbons** (HC) and **Carbon Dioxide** (CO<sub>2</sub>)
- The use of natural substances in the insulation process
- Optimized and efficient design, best-in-class components and “intelligent” energy-management systems which allow the **Frigoglass Ecocool** units to be significantly more economic to run
- Advanced assembly techniques and the use of fewer materials which contribute to increased recyclability
