

Planogram Intelligence. Anywhere.

Turn Every Cooler Into a Source of Insight

Unbound Insight extends intelligence beyond the cooler itself.

Using AI-powered visual recognition, it monitors real-time execution and ensures that every asset performs as intended.

From planogram compliance to product availability, Unbound Insight gives you full visibility of what is happening in the field—across any cooler, any location.

From Visibility to Action

Unbound Insight transforms image data into clear, actionable intelligence.

Operators can remotely verify execution, prioritize interventions, and ensure brand consistency across every point of sale without relying on manual checks.

The result: improved availability, better assortment control, and stronger sales performance.

AI-Powered Visibility. Real-World Execution.

- AI-powered visual verification of in-store execution
- Detects out-of-stocks, planogram deviations, and competitor presence
- Ensures correct refill and assortment compliance
- Identifies underperforming assets through engagement tracking
- Tracks asset location, movement, and operational status
- Delivers actionable insights to optimize performance and ROI

Works Across Your Installed Base

Unbound Insight is not limited to new equipment.

It can be deployed across existing cooler fleets, enabling digital transformation without replacing hardware.

A scalable solution that adapts to your market, your assets, and your operational needs.
